Immediate Document Delivery

Easy-to-use remote printing software.

Print original-quality documents, including **COLOR**, in real-time to any printer **anywhere** in the world.

Cost savings! Time savings!

Replace fax and courier delivery with Net2Printer.

Immediate real-time document delivery.

Original-quality printing. Documents can be printed **anywhere** just like they print locally.

Overcomes the need for compatible software to open and print a document.

Documents print automatically on the recipient's printer without participation from the recipient.

Built-in file transfer feature overcomes file size and file type limitations of Email.

Net2Printer works with firewalls, proxy servers, and within VPN intranets.

Recipient printer driver is not required.

Begin saving money on all of your printed correspondence now.

Eliminate Email filters rejecting attachments, and the frustration of ZIPping files to transfer them to others.

Create company-wide document and file exchange networks to improve corporate communications and efficiency.
